Major factors to consider an SPF roof over the others are:

	SPF	BUR	Single Ply	Mod Bit
Seamless	YES	NO	NO	NO
Air Barrier	YES	NO	NO	NO
Lateral Water Under Membrane	NO	YES	YES	YES
Leaks When punctured	NO	YES	YES	YES
Guaranteed NO Wind Lift Off	YES	NO	NO	NO
20 Year Warranty Available	YES	YES	YES	YES
Lightweight	YES	NO	YES	NO
Sustainable/Renewable	YES	NO	NO	NO
40 Year Proven Performance	YES	YES	NO	YES
Suspected Carcinogen	NO	YES	NO	YES
Self-Flashing	YES	NO	NO	NO
Class A Fire Rating	YES	YES	YES	YES
Insulation Compressive Strength	50+psi	22psi	22psi	22psi
Thermal Shorts	NO	YES	YES	YES

It is pretty easy to see the advantages of an SPF roof.

With the addition of Silicone or an Acrylic the energy credits are available.

However, Silicone and Acrylics can still allow punctures

The ULTIMATE roof system is an SPF Foam Roof with an application of PURE POLYUREA, for an almost indestructible system. An application of silicone or acrylic to the PURE POLYUREA will give energy credits as well.
